

Neil G. Aldrin

CONTACT INFORMATION	3371 Lebon Dr. Apartment 303 San Diego, CA 92122	(858) 922-4755 nalldrin@cs.ucsd.edu http://neilalldrin.com/
OBJECTIVE	To advance my career through employment in industrial/academic research in computer vision	
EDUCATION	University of California, San Diego <i>Ph.D., Computer Science and Engineering, 09/08 (expected)</i> <i>C. Phil., Computer Science and Engineering, 12/06</i> <i>M.S., Computer Science and Engineering, 12/05</i> <ul style="list-style-type: none">o Dissertation: <i>Models and Methods for Recovering Shape, Reflectance, and Illumination From Images</i>o Advisor: David Kriegmano GPA: 3.81	La Jolla, CA 09/02 – Present
	University of California, Berkeley <i>B.S., Electrical Engineering and Computer Science, 05/02 with High Honors</i> <ul style="list-style-type: none">o GPA: 3.79	Berkeley, CA 08/98 – 05/02
RESEARCH INTERESTS	Computer Vision <ul style="list-style-type: none">o Image-Based Reconstructiono Shape-From-Xo Photometric Stereoo BRDF/Illumination Estimationo Non-Lambertian Computer Visiono Computational Photographyo Augmented Realityo Ubiquitous Computing	
EXPERIENCE	University of California, San Diego <i>Research Assistant</i> <ul style="list-style-type: none">o Advisor: Prof. David Kriegmano Research in computer vision	La Jolla, CA 06/04 – Present
	Tandent Vision Science <i>Consultant</i>	San Francisco, CA 2008
	Delta Design <i>Intern, Computer Vision</i> <ul style="list-style-type: none">o Manager : Ken Ding, Ph.D.o Developed in-house computer vision library based on OpenCV	Poway, CA 06/06 – 08/06
	University of California, San Diego <i>Teaching Assistant</i> <ul style="list-style-type: none">o CSE 252A - Graduate Computer Vision I (Wi. 2006, Wi. 2007)o CSE 105 - Intro to the Theory of Computation (Wi. 2006)o CSE 111 - Object Oriented Software Design (Fa. 2003, Sp. 2004, Sp. 2005)o CSE 3 - Fluency in Information Technology (Wi. 2005)o CSE 123A - Computer Networks (Wi. 2004)	La Jolla, CA 09/03 – 03/07

University of California, Berkeley
Student Researcher

Berkeley, CA

06/01 – 05/02

- Project Advisor: Prof. John Canny
- Worked on Universal Planar Manipulator Project

HONORS AND
AWARDS

Micro Fellowship, UC San Diego, 2003
Graduated with High Honors from UC Berkeley, 2002
Ford Motor Company Scholar, 2001 and 2002
Member of Eta Kappa Nu and Tau Beta Pi

PUBLICATIONS

COURSEWORK

University of California, San Diego

- Algorithms, Appearance Modeling, Computer Architecture, Computer Vision I & II, Networks, Neural Networks, Operating Systems, Software Architecture, Theory of Complexity

University of California, Berkeley

- Algorithms, Artificial Intelligence, Compilers, Digital Hardware Design, Operating Systems, Signals and Systems

PROJECTS

University of California, San Diego

- *Photometric Stereo*: My three most recent projects involve photometric stereo. Specifically, I have focused on the use of general reflectance models that are valid for a wider range of materials than previous methods. (In CVPR 2007, ICCV 2007, and CVPR 2008).
- *Lighting Estimation*: In 2006, I researched a novel method for lighting estimation in which BRDFs were fabricated to output frequency domain coefficients of the incident light field. (In CVPR 2006).
- *BRDF Estimation*: As part of CSE 272 (Advanced Appearance Modeling), I examined the problem of recovering diffuse reflectance under natural illumination conditions. My approach utilized low-frequency approximations of the illumination and BRDF using spherical harmonics.
- *Pedestrian Detection*: As part of CSE 252C, I implemented a version of the Adaboost pedestrian detector popularized by Viola and Jones.
- *Super-Resolution*: In 2005, I wrote a summary paper on super-resolution.
- *Classification & Clustering*: As part of CSE 253 (Neural Networks), I worked on three projects – (1) a comparison of EM and k-means clustering algorithms; (2) gender classification using neural networks; and (3) classification of facial expression using radial basis function networks.

- *Failure Prediction in Hardware Systems*: In CSE 221 (Operating Systems), I helped analyze sensor data from a set of servers in order to predict failures.
- *TCP Nicer*: In CSE 222 (Networking), I helped implement and analyze an extension to TCP Nice, a sender side modification of the TCP protocol to allow flows of different priority.
- *ActiveCampus.ucsd.edu*: In 2004, I worked with Bill Griswold and others on the ActiveCampus.ucsd.edu project. This involved programming and testing using various web technologies such as PHP and SOAP.

University of California, Berkeley

- *Universal Planar Manipulator (UPM)*: I collaborated with Prof. John Canny and Dan Reznik, Ph.D. on the UPM project. My primary responsibility was the creation of new demos for the UPM, which involved non-trivial modification and extension of the source code (particularly in the control logic and camera tracking modules).
- *MIDI Synthesizer*: As part of EECS 150, I designed and implemented a MIDI synthesizer on an FPGA board using Verilog.

SKILLS

Languages & Technologies:

- Matlab, C, C++, OpenCV, PBRT, POVRay, Java, Linux, CVS, SVN, HTML, PHP

Computer Vision, Graphics, & Machine Learning:

- Shape-From-{Shading,Silhouettes,Motion,Structured Lighting}, Camera Calibration, Graph Cuts, SIFT, Adaboost, Super-Resolution, Optical Flow, Edge Detection, K-Means/EM Clustering, Matrix Factorization, HDR Imaging, BRDF Measurement, KLT Tracker, RANSAC

**PROFESSIONAL
ACTIVITIES**

Reviewer:

- IEEE Conference on Computer Vision and Pattern Recognition (CVPR)
- IEEE International Conference on Computer Vision (ICCV)

IEEE Student Member, 03/05 – Present

Organizer: Pixel-cafe (weekly talks from UCSD Vision and Graphics lab), 03/07 – 06/07

**INTERESTS AND
HOBBIES**

Open source software:

- I have been using GNU/Linux for over eight years. While I haven't participated directly as a developer, I regularly submit bug reports and contribute to web forums.

Christianity:

- I attend Clairemont Emmanuel Baptist Church and was part of the UCSD graduate Christian fellowship leadership team in 2006/2007.

Sports:

- While at UCSD I have participated in intramural sports (flag football, indoor soccer, basketball, and softball). I also enjoy tennis, ultimate frisbee, and bowling.

Music:

- I play guitar and piano recreationally.
